

Ecology response for H/24/96647 38 YARDLEY ROAD, HEDGE END, SOUTHAMPTON, SO30 0HQ

Increased dormers to both north and south elevations with additional side dormer to north elevation

Claire Campbell-Best

25/1/24

There are records of bats very near this site and the proposal involves works to the roof. From the photo of the house available on Google maps, the existing dormers appear to be covered with hanging tiles. A preliminary bat roost assessment is required.

Biodiversity enhancements will be required. A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. ([https://www.bats.org.uk > our-work > putting-up-your-box](https://www.bats.org.uk/our-work/putting-up-your-box))

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
