

Ecology response for H/24/96905 14 HADRIANS CLOSE, CHANDLER'S FORD, EASTLEIGH, SO53 2AS

Single storey front and rear extension, front porch, raised rear patio and alterations to elevations and existing fenestration

Clare Campbell-Best

4/3/24

There are records of bats, hedgehogs, and stag beetles near this site. Photos are required to determine whether a preliminary ecological appraisal survey will be needed. Photos should include close ups of all elevations of the roof, and any areas which will be impacted by these proposals, soffits, fascia, flashings and window frames, and the front and rear gardens.

A precautionary working method for hedgehogs and stag beetles will be required.

Biodiversity enhancements will be required. A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. ([https://www.bats.org.uk > our-work > putting-up-your-box](https://www.bats.org.uk/our-work/putting-up-your-box))

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
