

Hi Clare,

We received an email from Trevor Heaps (the Arb) on Monday stating that a revised report was submitted on the 16th of Feb. I haven't seen this, please can you request a copy?

I understand the access works and hard standing are not included within the planning application, but it would be good to condition the most up to date arb report, if possible.

The development must accord with the arboricultural report reference XXXXX. No excavation, demolition or development related works shall commence until the tree protection measures have been installed as per the tree protection plan contained within the report. Once installed, no access by vehicles or placement of goods, chemicals, fuels, soil or other materials shall take place within the protected area. Tree protection measures shall be retained in their approved form for the duration of the work and may only be modified subject to written agreement from the LPA. Reason - To retain and protect the existing trees which form an important part of the amenity of the locality.

Happy to chat, if needed.

Chris.
