FINISHING TOUCHES

BRITAIN'S FINEST TIMBER WINDOWS & DOORS

Making your vision a reality

At Mumford & Wood we believe that the finishing touches are just as important as the product itself. Extra care is taken to help you choose the best options for your new windows and doors, including glazing, ironmongery and finish. Our four key ironmongery collections have been carefully created to ensure that no matter what finish you choose for your door or window, you can find a range of products that will compliment and match your style.

We have a core paint offering, designed to suit a wide range of tastes. But if you have a particular colour in mind, we have over 40,000 options for you to choose from, plus a wide collection of stain finishes. Glazing can also be tailored to your requirements, whether you prefer a decorative, stained, etched, patterned, sandblasted or plainer look.

We will be on hand to guide you all the way.

BECAUSE THE DETAIL MATTERS

PERFORMANCE

When you buy windows from Mumford & Wood, you know that you are investing in a high-performance product that will look good for years to come. By selecting premium grade materials and engineered timber, we can offer stability and a knot-free finish. Timber substrates provide greater thermal performance, comfort, acoustics and ensure that aesthetically it exceeds expectation.

SECURITY

Products within our conservation range are tested to comply with Part Q of Building Regulations. Our windows and doors are manufactured to offer superior strength and security. Casement windows all have lockable handles, doors have multipoint locks and our sash window ranges offer dual locks. We use toughened glass as standard and can even offer a laminated external pane for extra security.

GUARANTEES

At Mumford & Wood we have designed three key product ranges that enable us to manufacture timber windows and doors that suit homes and commercial buildings regardless of their age, size or style. Our comprehensive product ranges often mean that we are a favourite amongst architects, planning authorities and preservation societies with the ability to adapt our products for even the most stringent building requirements. The below shows the guarantees we offer per product range.

Conservation						
Classic						
Heritage						

SUSTAINABILITY

As a Carbon Neutral Organisation, sustainability is fundamental to how we operate our business. Our engineering technique allows us to leave all the wood that is not used in the country of origin where it is recycled at source. As a result, certificated timber used by Mumford & Wood is the most renewable, sustainable material in our industry. All Mumford & Wood products are manufactured using FSC certified timber and specified for Chain of Custody. As a business that relies on natural resources, we have chosen to support a variety of tree planting schemes and recycling projects, contributing to the preservation of our environment and biodiversity.

MADE IN BRITAIN

One of Mumford & Wood's unique traits is that we focus on manufacturing our Timber Windows & Doors at our own UK factory, using only highly experienced designers and craftsmen. In addition, we focus on controlling the entire manufacturing process from initial design and build to completion.

This ensures comprehensive quality control at every stage of production, so you can be assured that nothing will leave our factory until we all believe it is perfect.

OUR PRODUCT RANGES

Over the last seventy years we have developed strong relationships with contractors, homeowners, architects and planning authorities, helping us to create three core product ranges that suit projects of all types. From new builds to listed buildings, we are confident we can create something beyond expectation.

CONSERVATION

Our Conservation range is suitable for most projects and can be tailored to suit design requirements using our various glazing bar and moulding options. All of our Conservation range products have the ability to meet modern Building regulation standards.

CLASSIC

Our traditionally styled Classic range offer truly authentic period aesthetics and can be used for most buildings within Conservation areas or in some listed buildings, whilst providing an impressive level of security.

HERITAGE

Heritage products are designed to replace original period doors and windows found in listed buildings. This range is also suitable in sensitive conservation areas where double glazed products are not appropriate and where full compliance with modern Building Regulations is not required. Windows and doors are glazed traditionally using putty and true glazing bars, which are available in various sizes and profiles including; Georgian, Gothic, Victorian or Queen Anne Ovolo.

OUR PRODUCTS

BOX SASH WINDOWS

Our box sash windows feature traditional weights, heavy-duty ball bearing pulley wheels and pre-stretched nylon cords that will not break or stretch.

These products offer authentic period styling that suit both traditional and modern properties.

DOOR TYPES

We can design and manufacture doors of any design, suitable for contemporary or traditional buildings. Our most popular designs are shown below, however we would encourage you to talk to our team to build the perfect entrance for you.

Security is incredibly important which is why all of our doors are hung on strong, adjustable hinges and feature robust multipoint locking mechanisms. Fanlights, sidelights and special glazing can all be added to create a finish unique to you.

UNIQUELY YOU

All of our windows and doors are designed and manufactured, tailored to your requirements.

We relish creating designs that stand out from the crowd, which include special shaped casements and curved on plan windows, ideal for bays and curved walls. Perhaps you have an outbuilding that needs some love and attention? Our offering isn't only limited to houses and commercial buildings.

GLAZING

We have a range of glazing options to cater for your exact requirements, whether for decorative, practical or privacy purposes.

Whether you are looking for a practical, luxury, private or unique look, our wide variety of glazing options will help to define the look of your home. We can also provide glazing ranges that address acoustics, thermal and solar options. If you have a particular vision in mind just give us a call.

PROFILES

We offer a range of frame profiles and glazing bar options designed to suit buildings of any age or style

We have a number of glazing bar designs available, ranging in depth, shape and style. So whether you require a contemporary or classic aesthetic, we are confident we can find something to suit your window needs.

Our Conservation range windows are internally glazed, with Classic and Heritage being glazed externally.

COLOURS AND FINISHES

COLOURS AND FINISHES

Our products can be finished with a wide choice of colours. Most customers choose our sleek ‘Signal White,’ but we have over 40,000 bespoke colours to offer, so whatever colour scheme you choose, we are confident we can match it. In addition, we can offer a ‘dual finish’ where different colours are desired internally and externally or a ‘mixed finish’ where frames are specified to be contrasting to sashes. Whilst aesthetics are important, We also know that the finish is what makes your product last. Every product endures a rigorous finishing process using state of the art machinery before being completed by hand, using the most skilled operatives. Numerous coats of industry recognised paint are spray applied, using a microporous finishing system, ensuring the timber is allowed to ‘breathe,’ so you know, whatever the weather, your product will look amazing for longer.
