

Ecology response for H/24/97072 11 TREVOSE CLOSE, CHANDLER'S FORD, EASTLEIGH, SO53 3EB

Single storey side and rear extension to form annexe (revised scheme to H/23/95398)

Claire Campbell-Best

4/4/24

This site is in a green impact risk zone for great crested newts. There are records of bats, stag beetles and hedgehogs nearby. I don't see any obvious potential bat roost features on the site photos which would be impacted by this proposal.

Please could you add the following informative to the decision notice:

In the unlikely event of any bats being found during demolition or construction, all work must stop immediately, and Natural England must be called. Additional information is available on the Bat Conservation Trust website at <https://www.bats.org.uk/advice/im-working-on-a-building-with-bats/ive-found-a-bat-during-works>.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF paragraph 180.

A bat box and a swift nest box may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight. (<https://www.swiftconservation.org/Nestboxes%26Attraction.htm>)
