

Ecology response for H/24/97163 THE OLD BARN, ALLINGTON MANOR FARM, ALLINGTON LANE, WEST END, SOUTHAMPTON, SO50 7DE

To infill existing lean to extension

Rebecca Altman

17/4/24

Although this site is in an ecologically sensitive area, the scope of the proposal is quite small and will not affect the area outside the footprint of the extension.

There are records of bats nearby. From looking at the site photos, I don't think that bats would be using the existing leant-to structure.

Please could you add the following informative to the decision notice:

In the unlikely event of any bats being found during demolition or construction, all work must stop immediately, and Natural England must be called. Additional information is available on the Bat Conservation Trust website at <https://www.bats.org.uk/advice/im-working-on-a-building-with-bats/ive-found-a-bat-during-works>

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF paragraph 180.
