

Ecology response for H/24/96882 21 NETLEY FIRS ROAD, HEDGE END, SOUTHAMPTON, SO30 4AY

Two storey side extension and single storey side extension

Claire Campbell-Best

18/4/24

This site is in a green impact risk zone for great crested newts. There are records of bats, slow worms, stag beetles and hedgehogs near this site.

Close up photos of the house and garden taken in good light are required to determine whether a survey is required. Photos must show the entire roof of the house, soffits, fascia, areas around the windows and the sides of the building and the garden which would be affected by the extensions.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF paragraph 180. A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. ([https://www.bats.org.uk > our-work > putting-up-your-box](https://www.bats.org.uk/our-work/putting-up-your-box))

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
