

Application No /f/22/93663

143-145 Passfield Avenue Eastleigh so509nh

Method Statement

Stage One Of Build

Safety Fences and screen around building site

Removal of wall

This will be done by hand to ensure that nothing falls over onto next doors land (we have asked permission to put fences on their land) and to minimise and dust creation

If we use any cutting equipment this will have a water connection to stop dust.

(no piling necessary)

Deliveries

This will be made off peak times and can be delivered direct to site via the made road.

As this will be built by myself, we won't be having any temporary building as I have use of the buildings.

Building Times

Monday to Thursday

8am to 5pm

To work around my current job.

Temporary Site Structures

There will be no temporary site structure on the site throughout the build.

Parking Of Site Operatives

All operatives will park at the existing front car parking of the plot on the existing hardstanding in order to minimise transference of mud from site to highways.

Waste

This will be put into skip on an area of the site without mud, with collection of skip by separate vehicles so as to create no transference of mud from site to highway.

Any further information please don't hesitate to contact me.

Mark Teague
