

Item No:	Product Name:	Colour:	Size(s):
1	Trident Block Paving	Siera	160x240
2	Avenu Block Paving	Forest Blend	160x240
3	Avenu Block Paving	Charcoal	160x160
4	Avenu Linear	Forest Blend	50x200
5	Avenu Block Paving	Grey	160x160
6	Trident Block Paving	Burnt Ochre	160x240
7	Sleeper Display	N/A	
8	Gardenstone	Sunset Buff	4 Mixed Sizes
9	Avenu Linear	Charcoal	50x200
10	Gardenstone	Pure Grey	4 Mixed Sizes
11	Granite Setts	Silver	100x100
12	Limestone Collection	Midnight	4 Mixed Sizes
13	Gardenstone	Raj Blend	4 Mixed Sizes
14	Sleeper Planters		
15	Avenu Linear	Burnt Ochre	50x200
16	Sandstone Porcelain	Mercury	600x900
17	Jewell	Smokey	600x900
18	Serenity	Cream	600x600
19	Serenity	Grey	600x600
20	Serenity	Anthracite	600x600
21	Burlington	Silver	600x900
22	Burlington	Blue	600x900
23	Burlington	Rust	600x900
24	Burlington	Ivory	600x900
25	Small Size Series	Texture Grey	200x300
26	Station	Iron	600x1200
27	Porcelain Cladding	Quartz Gold/Chrome	1m2 Boxes
28	Arctic Granite	Glacier	300x600
29	Brick Planter	Choice 1	
30	Brick Planter	Choice 2	

PLANTING MAINTENANCE
Eco Species Rich Lawn:
Mix to be sown directly into cultivated low fertility subsoil in accordance with manufacturers recommendations at rate of 10g/m².
Preparation: Cultivate subsoil, apply a suitable herbicide and allow the correct time to elapse, as directed by the manufacturer, and seed the bed. No fertiliser, compost or mulch are to be applied to the bed.
Sowing:
• Seed to be sown between March and October. Create a fine friable seedbed down to 150 mm in depth. Carry out two equal sowings at right angles to each other and diagonally to main axis. Broadcast manually or use seed drill, rake level and roll. Ensure good seed to soil contact.
First Year Management:
• Soon after sowing there will be a flush of annual weeds, arising from the soil seed bank. Resist cutting the annual weeds until mid to late summer, then cut, remove and compost. Dig out any residual perennial weeds such as docks.
Maintenance of Lawn & Brick Planters to be carried out by branch:
• Lawn will be cut once a year from mid-August to early October
• Annual and perennial weeds to be removed mid-summer
• Planters to be weeded every other month
• Litter to be picked up and removed at all times
• Mulch to be applied at the end of each summer and any damaged plants to be replaced
Note: At time of each cut all arisings to be removed from the bed to maintain reduced soil productivity.
GENERAL WATERING
All soft landscaping to be subject to a watering regime which is absolutely essential to ensure the continued success of the scheme, particularly during the initial 12 month establishment period. The watering frequency should be as necessary to ensure the continued thriving of all grass and ornamental planting. Note that during dry periods it may be necessary to increase watering to once per week. The soil should be checked for dryness using either a soil moisture sensor or by inserting a spade into the ground to a depth of 300mm to observe the appearance of the soil. If the soil is moist there is no need to water but if it is bone dry then watering procedure should be carried out immediately. Water supply should be from potable mains water or an approved alternative. The full depth of topsoil should be wet without loosening or damaging plants. Any compacted soil should be broken up sufficiently to allow water to reach the rootzone.
