PROW HCC Access Development Officer Consultation Response received 23/04/2024

Thank you for consulting Hampshire Countryside Service, the Highways Authority for Public Rights of Way, on these applications. Bursledon Footpath 505 runs northeast from opposite the site's main vehicle access on Station Hill downhill to the train station car park. The proposed works are not envisaged to have any significant impact on the PROW and, therefore, the Countryside Service raises no objection to both applications.
