

Ecology response for H/24/97236 1 MANOR FARM COTTAGE, ALLINGTON LANE, WEST END, SOUTHAMPTON, SO50 7DE

Demolition of existing conservatory and construction of new single storey rear extension.
Amendment to planning permission H/23/95887

Claire Campbell-Best

15/4/24

I have no additional ecology comments for this application. From an ecological viewpoint it is very similar to the previous applications. A green roof was proposed as a biodiversity enhancement in previous applications however it does not seem to be included in this latest application.

Please could you add the following informative to the decision notice:

In the unlikely event of any bats being found during demolition or construction, all work must stop immediately, and Natural England must be called. Additional information is available on the Bat Conservation Trust website at <https://www.bats.org.uk/advice/im-working-on-a-building-with-bats/ive-found-a-bat-during-works>.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF paragraph 180. A bat brick and a swift brick may be appropriate for this building..

<https://www.bats.org.uk/our-work/buildings-planning-and-development/bat-boxes>

If a bat box is positioned on the same wall as the extension, please check to ensure that the light coming out of the roof lanterns does not shine on the bat box.
