

Ecology response for H/24/97219 MICHANN, ALBERT ROAD, HEDGE END, SOUTHAMPTON, SO30 0DJ

Two storey rear extension following demolition of the existing conservatory and utility room, covered front porch and alterations to fenestration

Claire Campbell-Best

30/4/24

This site is in a green impact risk zone for great crested newts. There are records of bats and stag beetles nearby and hedgehogs in the wider area.

The proposals will affect the existing roof. Photos are required to determine whether a survey will be required. The photos should be taken up close, in good light, and include all areas of the roof, soffits, fascia, cladding, flashing, and areas around the windows.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF paragraph 180. A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. ([https://www.bats.org.uk > putting-up-your-box](https://www.bats.org.uk/our-work/putting-up-your-box))

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight. (<https://www.swiftconservation.org/Nestboxes%26Attraction.htm>)
