Description of Proposed Works

Please describe the proposed works

We will be replacing an existing gate with a taller wooden fence with concrete pillars. This gate cannot be used anyway, as there is no dropped curb and the stretch of road is consistently used for parking. However, it does allow people to look into our garden and isn't consistent with the height of the existing hedge which surrounds the garden.

From quotation:

- Take down the existing pair of metal gates and remove from site leaving the metal gate posts in place.
- Supply and erect 3 metres of 5ft high closeboard fencing using 100 x 50mm mortised timber plates bolted to the existing metal gate posts fitted with a timber gravel board.
- Supply and erect 5.3 metres of 5ft high closeboard fencing using 100 x 100mm mortised timber posts set in concrete footings fitted with timber gravel boards.
- The fences are complete with 300mm trellis panels above.

Amendment to use concrete posts instead:

The section between the metal gate posts will be between timber plates as we will be bolting them to the existing metal gate posts. If we are changing the 100 x 100mm timber posts to concrete posts, we cannot fix the trellis to the inside of the concrete posts like we would have with the timber posts, we will need to bolt timber plates to the inside of the concrete posts so that the trellis can be fixed in between.
