Dear Sir/Madam,

**Proposal:** Two-storey rear extension following demolition of existing rear extensions, addition of new roof with front facing dormer window to existing side projection, elevational alterations, and partial conversion of building to form 5no. new residential flats, with existing 1no. flat and 2no. commercial units to be retained.

**Site:** F/24/97159: - St Andrews Buildings, High Street, Hamble-Le-Rice, SO31 4JE.

Thank you for your letter dated 15 April 2024.

Following the review of the submitted documents, we have the below comments for the Planning consultation.

### **Protection of Public Apparatus**

Please see the attached extract from Southern Water records showing the approximate position of our existing public foul sewer within the development site. The exact position of the public asset must be determined on site by the applicant in consultation with Southern Water before the layout of the proposed development is finalised.

- The gravity sewer requires a clearance of 3 metres on either side of the gravity sewer to protect it from construction works and to allow for future maintenance access.
- No development or tree planting should be carried out within 3 metres of the external edge of the public gravity sewer without consent from Southern Water.
- No soakaways, swales, ponds, watercourses or any other surface water retaining or conveying features should be located within 5 metres of public or adoptable gravity sewers.

- All existing infrastructure should be protected during the course of construction works.

Please refer to: [southernwater.co.uk/media/st5orjvm/stand-off-distances.pdf](https://southernwater.co.uk/media/st5orjvm/stand-off-distances.pdf)

It is possible that a sewer now deemed to be public could be crossing the development site. Therefore, should any sewer be found during construction works, an investigation of the sewer will be required to ascertain its ownership before any further works commence on site.

### **Foul and Surface Water Drainage**

Southern Water requires a formal application for any new connection to the public foul sewer to be made by the applicant or developer.

To make an application visit Southern Water's Get Connected service: [developerservices.southernwater.co.uk](https://developerservices.southernwater.co.uk) and please read our New Connections Charging Arrangements documents which are available on our website via the following link: [southernwater.co.uk/developing-building/connection-charging-arrangements](https://southernwater.co.uk/developing-building/connection-charging-arrangements)

In situations where surface water is being considered for discharge to our network, we require the below hierarchy for surface water to be followed which is reflected in part H3 of the Building Regulations. Whilst reuse does not strictly form part of this hierarchy, Southern Water would encourage the consideration of reuse for new developments.

- Reuse
- Infiltration
- Watercourse
- Storm sewer
- Combined Sewer

Guidance on Building Regulations is here:

[gov.uk/government/publications/drainage-and-waste-disposal-approved-document-h](https://gov.uk/government/publications/drainage-and-waste-disposal-approved-document-h)

The Council's Building Control officers or technical staff should be asked to comment on the adequacy of soakaways to dispose of surface water from the proposed development.

For further advice, please contact Southern Water, Southern House, Yeoman Road, Worthing, West Sussex, BN13 3NX (Tel: 0330 303 0119).
