15/05/2024

Dear Dorothy,

Arboricultural Information

- Tree survey reference ARBS_1010_100
- Tree protection plan reference ARBS_1010_110

Comments

As identified in the arboricultural information, there are some significant trees to the south of the proposed development area. The submitted tree protection plan is sufficient and demonstrates that the trees can be protected and retained.

Therefore, we raise no arboricultural objection, subject to the following condition:

No excavation, demolition or development related works shall commence until the tree protection measures have been installed as per the tree protection plan reference ARBS_1010_110. Once installed, no access by vehicles or placement of goods, chemicals, fuels, soil or other materials shall take place within the protected area. Tree protection measures shall be retained in their approved form for the duration of the work and may only be modified subject to written agreement from the LPA. Reason - To retain and protect the existing trees which form an important part of the amenity of the locality.

Kind regards,

Chris.
