Ecology response amended for F/24/97282 TELECOMMUNICATIONS MAST, SCHOOL LANE, CHANDLER'S FORD

Erection of security fencing and gates to surround existing equipment (generator, fuel tank and transformer) and associated fencing alterations.

Rachael Morris

21/5/24

The proposed biodiversity enhancement of 3 Sparrow Towers (3 pairs of sparrows per tower) mounted under the eaves on the northern elevation of the adjacent building is appropriate. I have no further ecology concerns.

Lisa Malter

17/5/24

This application is to replace existing fencing with more secure fencing in the same locations.

The site is within a green impact zone for great crested newts, and there are records of bats and nesting swifts nearby but there is no suitable habitat for these species on site.

No ecological impact from these works is anticipated. Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF paragraph 180.
