

Ecology response for H/24/97262 43 SATCHELL LANE, HAMBLE-LE-RICE, SOUTHAMPTON, SO31 4HF

Single storey rear and side extension, hip to gable loft conversion to include roof lights to front and rear and Juliette balcony to front elevation and alterations to fenestration and external materials

Claire Campbell-Best

23/5/24

This site is in a green impact risk zone for great crested newts. There are records of bats, slow worms, and swifts near this site.

To determine whether any surveys are required I need to review close-up photos of any areas of the house and garden which would be affected by the proposal. This includes all areas of the roof, windows, soffits, fascia and flashing.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF paragraph 180. A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. ([https://www.bats.org.uk > putting-up-your-box](https://www.bats.org.uk/our-work/putting-up-your-box))

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
