

Ecology response for H/24/97353 3 PRIMROSE CLOSE, HEDGE END, SOUTHAMPTON, SO30 0LL

Single storey side and rear extensions following removal of existing rear reception room and partial garage conversion.

Claire Campbell-Best

23/5/24

This site is in a green impact risk zone for great crested newts. There are records of slow worms, bats, stag beetles and hedgehogs nearby.

To determine whether any surveys are required I need to review close-up photos of any areas of the house, garage and garden which would be affected by the proposal.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF paragraph 180. A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. ([https://www.bats.org.uk > our-work > putting-up-your-box](https://www.bats.org.uk/our-work/putting-up-your-box))

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
