Subject: RE: V/24/97448 - EIA Screening Opinion - River Itchen WTW Permanent Centrifuge

Hi Liz,

I have reviewed the information submitted and I agree with the report regarding both landscape and visual impact. Any effect is not significant in EIA terms however given the height of the proposal I would want to see a LVIA (non-EIA), proportional to the scale of development, submitted with a planning application. The LVIA should help to inform the location of the proposed facility to minimise its impact and suggest potential mitigation measures. Thanks, Tim
