Assessment Date	11/06/24				
Officer comments	The tree is situated within the property. It is a mature field maple in good vitality. The tree is visible from the public highway and offers good levels of visual amenity. The tree has previously been pruned. The applicant has proposed to reduce the crown by up to 80cm. This is unlikely to affect the long-term health or overall amenity value of the tree and is reasonable for the management of the tree within its location.
