Dear Sir/Madam,

Planning consultation: Residential Care Community, comprising a 73-bed care home (Use Class C2) and 5 x 2-bedroom close care cottages (Use Class C3 age restricted), with associated access, internal access road, parking, landscaping and infrastructure
Location: Land adjoining 4 Brookfield, Providence Hill, Bursledon

Thank you for your consultation on the above dated 08 May 2024 which was received by Natural England on the same day.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

SUMMARY OF NATURAL ENGLAND'S ADVICE

FURTHER INFORMATION REQUIRED TO DETERMINE IMPACTS ON DESIGNATED SITES

As submitted, the application could have a likely significant effect on designated sites in the Solent, including:

- Solent and Dorset Coast SPA
- Portsmouth Harbour SPA and Ramsar Site
- Chichester and Langstone Harbours SPA
- Solent Maritime SAC
- Solent and Southampton Water SPA

Your Authority will need to undertake a Habitats Regulations Assessment (HRA) to determine whether the proposal is likely to have a significant effect on the sites named above, proceeding to the appropriate assessment stage where significant effects cannot be ruled out. The following information is required to inform a HRA:

- Consideration of this project's effects on total nitrogen and/or total phosphorus nutrient loading within the Solent catchment, including a nutrient budget calculation.
- Details of proposed mitigation measures to address any nutrient impacts, including appropriately funded management and monitoring, and details of how the measures will be secured for the lifetime of the development.
- Any other likely significant effects that could arise from the development should also be assessed.

Once the above information is obtained, please consult Natural England on any appropriate assessment your authority may decide to make.

Natural England's Approach

As your Authority will be aware, there are impacts on nationally and internationally important wildlife sites in the Solent Catchment arising from excessive nutrients from wastewater discharge. On 9 March 2022, Natural England sent a letter (via email) to the Head of Planning at your Authority, explaining that Natural England is fully committed to working closely with your Authority to develop strategic approaches for delivering a nutrient neutrality to help development to proceed. At this time, Natural England is issuing this standard advice in response to planning consultations / proposals requiring nutrient neutrality that meet the following criteria:

- the proposal is for 150 homes or fewer
- the proposal is not accompanied by a habitats regulations assessment (HRA) which has been completed or adopted by the competent authority.

Standard Advice for Nutrient Neutrality

It is Natural England's view that there is a likely significant effect on the internationally designated sites in the Solent catchment due to the increase in wastewater from new housing. One way to address this is for new development to achieve nutrient neutrality. Nutrient neutrality is a means of ensuring that development does not add to existing nutrient burdens and this provides certainty that the whole of the scheme is deliverable in line with the requirements of the Conservation of Habitats and Species Regulations 2017 (as amended).

The supporting information for this proposal should include a nutrient budget and details of any proposed mitigation to address nutrient impacts. To demonstrate that proposed mitigation will remain effective for the lifetime of the development, information on management and monitoring will be required, together with details of how this will be secured and funded in perpetuity. This information should be considered by your authority in accordance with regulation 63 of the Conservation of Habitats and Species Regulations 2017 (as amended) i.e. through a HRA.

The proposed development, and the application of any measures to mitigate the likely harmful effects from it, should be formally checked and confirmed by your Authority, as the competent authority, via an appropriate assessment, in view of the European Sites' conservation objectives. Further information on carrying out a HRA as a competent authority can be found online¹.

¹ <https://www.gov.uk/guidance/habitats-regulations-assessments-protecting-a-european-site#follow-hra-principles>

Once a HRA has been completed or adopted by the competent authority, Natural England will review the proposal.

Please note that where the necessary avoidance and mitigation measures are limited to collecting a funding contribution that is in line with an agreed strategic approach for the mitigation of impacts on Habitats Sites then, provided no other adverse impacts are identified by your authority's appropriate assessment, your authority may be assured that Natural England agrees that the appropriate assessment can conclude that there will be no adverse effect on the integrity of the Habitats Sites. In such cases Natural England will not require a Regulation 63 appropriate assessment consultation. However please note it is strongly advised you as competent authority seek your own legal opinion on whether to consult under these circumstances. Further, your authority, as Competent Authority, should consider how the updated Nutrient Neutrality Methodology relates to the budget provided for any strategic mitigation, ensuring it is appropriate to mitigate this development. In all other cases (where impacts from the proposed development cannot be addressed solely by contributions to an agreed strategic approach) you must contact Natural England for further advice on your appropriate assessment. Permission should not be granted until such time as Natural England has been able to consider these impacts and respond.

Additional advice

Further general advice on the protected species and other natural environment issues is provided at Annex A.

Please note that if your Authority is minded to grant planning permission contrary to the advice in this letter and aforementioned letter sent to your Head of Planning, you are required under Section 28I (6) of the Wildlife and Countryside Act 1981 (as amended) to notify Natural England of the permission, the terms on which it is proposed to grant it and how, if at all, your Authority has taken account of Natural England's advice. You must also allow a further period of 21 days before the operation can commence.

Yours sincerely,

Eleanor Osborne
Thames Solent Area Team
Natural England

Annex A

Protected Landscapes

Paragraph 182 of the [National Planning Policy Framework - GOV.UK \(www.gov.uk\)](https://www.gov.uk/government/policies/national-planning-policy-framework) (NPPF) requires great weight to be given to conserving and enhancing landscape and scenic beauty within Areas of Outstanding Natural Beauty (known as National Landscapes), National Parks, and the Broads and states that the scale and extent of development within all these areas should be limited. Paragraph 183 requires exceptional circumstances to be demonstrated to justify major development within a designated landscape and sets out criteria which should be applied in considering relevant development proposals. Section 245 of the [Levelling-up and Regeneration Act 2023 \(legislation.gov.uk\)](https://www.legislation.gov.uk/ukpga/2023/1/section/245) places a duty on relevant authorities (including local planning authorities) to seek to further the statutory purposes of a National Park, the Broads or an Area of Outstanding Natural Beauty in England in exercising their functions. This duty also applies to proposals outside the designated area but impacting on its natural beauty.

The local planning authority should carefully consider any impacts on the statutory purposes of protected landscapes and their settings in line with the NPPF, relevant development plan policies and the Section 245 duty. The relevant National Landscape Partnership or Conservation Board may be able to offer advice on the impacts of the proposal on the natural beauty of the area and the aims and objectives of the statutory management plan, as well as environmental enhancement opportunities. Where available, a local Landscape Character Assessment can also be a helpful guide to the landscape's sensitivity to development and its capacity to accommodate proposed development.

Wider landscapes

Paragraph 180 of the NPPF highlights the need to protect and enhance valued landscapes through the planning system. This application may present opportunities to protect and enhance locally valued landscapes, including any local landscape designations. You may want to consider whether any local landscape features or characteristics (such as ponds, woodland, or dry-stone walls) could be incorporated into the development to respond to and enhance local landscape character and distinctiveness, in line with any local landscape character assessments. Where the impacts of development are likely to be significant, a Landscape and Visual Impact Assessment should be provided with the proposal to inform decision making. We refer you to the [Guidelines for Landscape and Visual Impact Assessment \(GLVIA3\) - Landscape Institute](https://www.landscapelinstitute.org.uk/guidelines-for-landscape-and-visual-impact-assessment-glvia3/) for further guidance.

Biodiversity duty

Section 40 of the [Natural Environment and Rural Communities Act 2006 \(legislation.gov.uk\)](https://www.legislation.gov.uk/ukpga/2006/41/section/40) places a duty on the local planning authority to conserve and enhance biodiversity as part of its decision making. We refer you to the [Complying with the biodiversity duty - GOV.UK \(www.gov.uk\)](https://www.gov.uk/government/consultations/complying-with-the-biodiversity-duty) for further information.

Designated nature conservation sites

Paragraphs 186-188 of the NPPF set out the principles for determining applications impacting on Sites of Special Scientific Interest (SSSI) and habitats sites. Both the direct and indirect impacts of the development should be considered. A Habitats Regulations Assessment is needed where there is a likely significant effect on a habitats site and Natural England must be consulted on 'appropriate assessments'. We refer you to [Appropriate assessment - GOV.UK \(www.gov.uk\)](https://www.gov.uk/government/consultations/appropriate-assessment) for more information. Natural England must also be consulted where development is in or likely to affect a SSSI and provides advice on potential impacts on SSSIs either via the [SSSI Impact Risk Zones \(England\) \(arcgis.com\)](https://arcgis.com) or as standard or bespoke consultation responses.

Protected Species

Natural England has produced [Protected species and development: advice for local planning authorities \(gov.uk\)](https://www.gov.uk/government/consultations/protected-species-and-development-advice-for-local-planning-authorities) (standing advice) to help planning authorities understand the impact of particular developments on protected species. Natural England will only provide bespoke advice on protected species where they form part of a Site of Special Scientific Interest or in exceptional circumstances. A protected species licence may be required in certain cases. We refer you to [Wildlife licences: when you need to apply - GOV.UK \(www.gov.uk\)](https://www.gov.uk/government/consultations/wildlife-licences-when-you-need-to-apply) for more information.

Local sites and priority habitats and species

The local planning authority should consider the impacts of the proposed development on any local wildlife or geodiversity site, in line with paragraphs 180, 181 and 185 of the NPPF and any relevant development plan policy. There may also be opportunities to enhance local sites and improve their connectivity to help nature's recovery. Natural England does not hold locally specific information on local sites and recommends further information is obtained from appropriate bodies such as the local records centre, wildlife trust, geoconservation groups or recording societies. Emerging [Local nature recovery strategies - GOV.UK \(www.gov.uk\)](https://www.gov.uk/government/publications/local-nature-recovery-strategies) may also provide further useful information.

Priority habitats and species are of particular importance for nature conservation and are included in the England Biodiversity List published under section 41 of the Natural Environment and Rural Communities Act 2006. Most priority habitats will be mapped either as Sites of Special Scientific Interest on the Magic website or as Local Wildlife Sites. We refer you to [Habitats and species of principal importance in England - GOV.UK \(www.gov.uk\)](https://www.gov.uk/government/publications/habitats-and-species-of-principal-importance-in-england) for a list of priority habitats and species in England.

Natural England does not routinely hold species data. Such data should be collected when impacts on priority habitats or species are considered likely. Consideration should also be given to the potential environmental value of brownfield sites, often found in urban areas and former industrial land. We refer you to the [Brownfield Hub - Buglife](https://www.buglife.org.uk/) for more information and Natural England's [Open Mosaic Habitat \(Draft\) - data.gov.uk](https://data.gov.uk/dataset/open-mosaic-habitat-inventory) (Open Mosaic Habitat inventory), which can be used as the starting point for detailed brownfield land assessments.

Biodiversity and wider environmental gains

Development should provide net gains for biodiversity in line with the NPPF paragraphs 180(d), 185 and 186. Major development (defined in the [National Planning Policy Framework \(publishing.service.gov.uk\)](https://www.publishing.service.gov.uk/glossary/term/national-planning-policy-framework) glossary) is required by law to deliver a biodiversity gain of at least 10% from 12 February 2024 and this requirement is expected to be extended to smaller scale development in spring 2024. For nationally significant infrastructure projects (NSIPs), it is anticipated that the requirement for biodiversity net gain will be implemented from 2025.

For further information on the timetable for mandatory biodiversity net gain, we refer you to [Biodiversity Net Gain moves step closer with timetable set out - GOV.UK \(www.gov.uk\)](https://www.gov.uk/government/news/biodiversity-net-gain-moves-step-closer-with-timetable-set-out). [Biodiversity net gain - GOV.UK \(www.gov.uk\)](https://www.gov.uk/government/publications/biodiversity-net-gain) provides more information on biodiversity net gain and includes a link to the draft [Biodiversity net gain - GOV.UK \(www.gov.uk\)](https://www.gov.uk/government/publications/biodiversity-net-gain) Planning Practice Guidance.

The statutory biodiversity metric should be used to calculate biodiversity losses and gains for terrestrial and intertidal habitats and can be used to inform any development project. We refer you to [Calculate biodiversity value with the statutory biodiversity metric - GOV.UK \(www.gov.uk\)](https://www.gov.uk/government/publications/calculate-biodiversity-value-with-the-statutory-biodiversity-metric) for more information. For small development sites, [The Small Sites Metric - JP040 \(naturalengland.org.uk\)](https://naturalengland.org.uk/jp040) may be used. This is a simplified version of the statutory biodiversity metric and is designed for use where certain criteria are met.

The mitigation hierarchy as set out in paragraph 186 of the NPPF should be followed to firstly consider what existing habitats within the site can be retained or enhanced. Where on-site measures are not possible, provision off-site will need to be considered.

Development also provides opportunities to secure wider biodiversity enhancements and environmental gains, as outlined in the NPPF (paragraphs 8, 74, 108, 124, 180, 181 and 186). Opportunities for enhancement might include incorporating features to support specific species within the design of new buildings such as swift or bat boxes or designing lighting to encourage wildlife.

[The Environmental Benefits from Nature Tool - Beta Test Version - JP038 \(naturalengland.org.uk\)](https://naturalengland.org.uk/jp038) may be used to identify opportunities to enhance wider benefits from nature and to avoid and minimise any negative impacts. It is designed to work alongside the statutory biodiversity metric.

[Natural environment - GOV.UK \(www.gov.uk\)](https://www.gov.uk) provides further information on biodiversity net gain, the mitigation hierarchy and wider environmental net gain.

Ancient woodland, ancient and veteran trees

The local planning authority should consider any impacts on ancient woodland and ancient and veteran trees in line with paragraph 186 of the NPPF. The [Natural England Access to Evidence - Ancient woodlands Map](#) can help to identify ancient woodland. Natural England and the Forestry Commission have produced [Ancient woodland, ancient trees and veteran trees: advice for making planning decisions - GOV.UK \(www.gov.uk\)](#) (standing advice) for planning authorities. It should be considered when determining relevant planning applications. Natural England will only provide bespoke advice on ancient woodland, ancient and veteran trees where they form part of a Site of Special Scientific Interest or in exceptional circumstances.

Best and most versatile agricultural land and soils

Local planning authorities are responsible for ensuring that they have sufficient detailed agricultural land classification (ALC) information to apply NPPF policies (Paragraphs 180 and 181). This is the case regardless of whether the proposed development is sufficiently large to consult Natural England. Further information is contained in the [Guide to assessing development proposals on agricultural land - GOV.UK \(www.gov.uk\)](#). [Find open data - data.gov.uk](#) on Agricultural Land Classification or use the information available on [MAGIC \(defra.gov.uk\)](#).

The Defra [Construction Code of Practice for the Sustainable Use of Soils on Construction Sites \(publishing.service.gov.uk\)](#) provides guidance on soil protection, and we recommend its use in the design and construction of development, including any planning conditions. For mineral working and landfilling, we refer you to [Reclaim minerals extraction and landfill sites to agriculture - GOV.UK \(www.gov.uk\)](#), which provides guidance on soil protection for site restoration and aftercare. The [Soils Guidance \(quarrying.org\)](#) provides detailed guidance on soil handling for mineral sites.

Should the development proceed, we advise that the developer uses an appropriately experienced soil specialist to advise on, and supervise soil handling, including identifying when soils are dry enough to be handled and how to make the best use of soils on site.

Green Infrastructure

For evidence-based advice and tools on how to design, deliver and manage green and blue infrastructure (GI) we refer you to [Green Infrastructure Home \(naturalengland.org.uk\)](#) (the Green Infrastructure Framework). GI should create and maintain green liveable places that enable people to experience and connect with nature, and that offer everyone, wherever they live, access to good quality parks, greenspaces, recreational, walking and cycling routes that are inclusive, safe, welcoming, well-managed and accessible for all. GI provision should enhance ecological networks, support ecosystems services and connect as a living network at local, regional and national scales.

Development should be designed to meet the 15 [GI How Principles \(naturalengland.org.uk\)](#). The GI Standards can be used to inform the quality, quantity and type of GI to be provided. Major development should have a GI plan including a long-term delivery and management plan. Relevant aspects of local authority GI strategies should be delivered where appropriate.

The [Green Infrastructure Map \(naturalengland.org.uk\)](#) and [GI Mapping Analysis \(naturalengland.org.uk\)](#) are GI mapping resources that can be used to help assess deficiencies in greenspace provision and identify priority locations for new GI provision.

Access and Recreation

Natural England encourages any proposal to incorporate measures to help improve people's access to the natural environment. Measures such as reinstating existing footpaths, together with the creation of new footpaths and bridleways should be considered. Links to urban fringe areas should also be explored to

strengthen access networks, reduce fragmentation, and promote wider green infrastructure.

Rights of Way, Access land, Coastal access and National Trails

Paragraphs 104 and 180 of the NPPF highlight the importance of public rights of way and access.

Development should consider potential impacts on access land, common land, rights of way and coastal access routes in the vicinity of the development. Consideration should also be given to the potential impacts on the any nearby National Trails. We refer you to [Find your perfect trail, and discover the land of myths and legend - National Trails](#) for information including contact details for the National Trail Officer. Appropriate mitigation measures should be incorporated for any adverse impacts.

Further information is set out in the Planning Practice Guidance on the [Natural environment - GOV.UK \(www.gov.uk\)](#).
