Subject: [F/24/97452] SAINSBURY'S SUPERMARKET, LEIGH ROAD SO50 9FH - Contaminated land and Air Quality comments

Follow Up Flag: Follow up
Flag Status: Completed

Hello Rachel,

Thanks for consulting the Pollution Team on the planning application F/24/97452 for the Installation of 3.no air source heat pumps and 1.no air condenser with associated fencing on the roof of existing store following removal of existing plant at SAINSBURY'S SUPERMARKET, LEIGH ROAD SO50 9FH. Following the noise comments made by our colleague Stuart Wedgbury, I would like to pass you our comments on contaminated land and air quality below:

The proposed works will be involving the installation of the proposed heat pumps in the roof of the existing building. No ground disturbance is anticipated. Therefore, the risk of contaminated land is negligible.

In regards air quality, it is not anticipated that the installation of the air-source heat pumps contributes significantly in the production of air pollutants such as NO2. The site is not located within our declared Air Quality Management Area. Based on these considerations, we have no objections on the proposed installation of the air-source heat pumps in the roof of Sainsbury's Supermarket.

In conclusion, we agree with the principle of the development and no have further comments on contaminated land or air quality.

I trust the above information is of assistance. If you have any further queries, do not hesitate in contacting me.

Best regards,

Yacklin
