

Ecology response for H/24/97363 22 KINGSWAY GARDENS, CHANDLER'S FORD, EASTLEIGH, SO53 1FE

REPLACEMENT SINGLE STOREY REAR EXTENSION AND ASSOCIATED ALTERATIONS

Claire Campbell-Best

23/5/24

This site is in a green impact risk zone for great crested newts. There are records of bats, common toads, hedgehogs, stag beetles and nesting swifts nearby.

To determine whether any surveys are required I need to review close-up photos of the existing single storey roof and any areas which would be affected by the proposal.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF paragraph 180. A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. ([https://www.bats.org.uk > our-work > putting-up-your-box](https://www.bats.org.uk/our-work/putting-up-your-box))

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight. (<https://www.swiftconservation.org/Nestboxes%26Attraction.htm>)
