TITLE: Land between Allington Manor Farm, Roddington Forge & Chalcroft Farm: Impact Plan for great crested newt District Licensing

11th July 2024

VERSION 2

Map data: © Google, Maxar Technologies

*Works are not permitted to directly or indirectly impact waterbody 'WD1' (including but not limited to pollution from runoff, dust, debris etc. both during and after construction). This pond is not permitted to be impacted by any increase in direct lighting both during and post construction.

**Temporary impacts permitted. The duration of temporary impacts to habitats can not exceed 365 days from the date of first commencement of Destructive Works within the area demarcated. Before the final day of permitted impact, habitat restoration work must be undertaken to enable habitat to return to the pre-impact condition.

Temporary impacts on high-value great crested newt habitat have been permitted because the proposed method of installation is to pile drive the solar panels. As such, much of the existing grassland would remain in place.
