Subject: RE: Planning Application Consultation Request F/24/97312
Date: 30 July 2024 10:27:25

Good morning,

The application has been reviewed from a primary care infrastructure capacity perspective by NHS Hampshire and Isle of Wight ICB.

Residents of care homes often have complex health needs and therefore create additional operational pressures on GP services, however rather than visiting the GP surgery for treatment they are visited at their place of residence. On this occasion the ICB will not be requesting a contribution request for additional infrastructure capacity.

The ICB would like to highlight that this response does not account for any current primary care operational pressures that the local surgeries are experiencing and there may be further responses to this application direct from the GP surgeries impacted by this application

Furthermore, if there is already sufficient Care Home capacity within the area then this development could lead to a disproportionate population increase of patients who will have higher than average health and care needs.

Kind Regards,

Mia
