

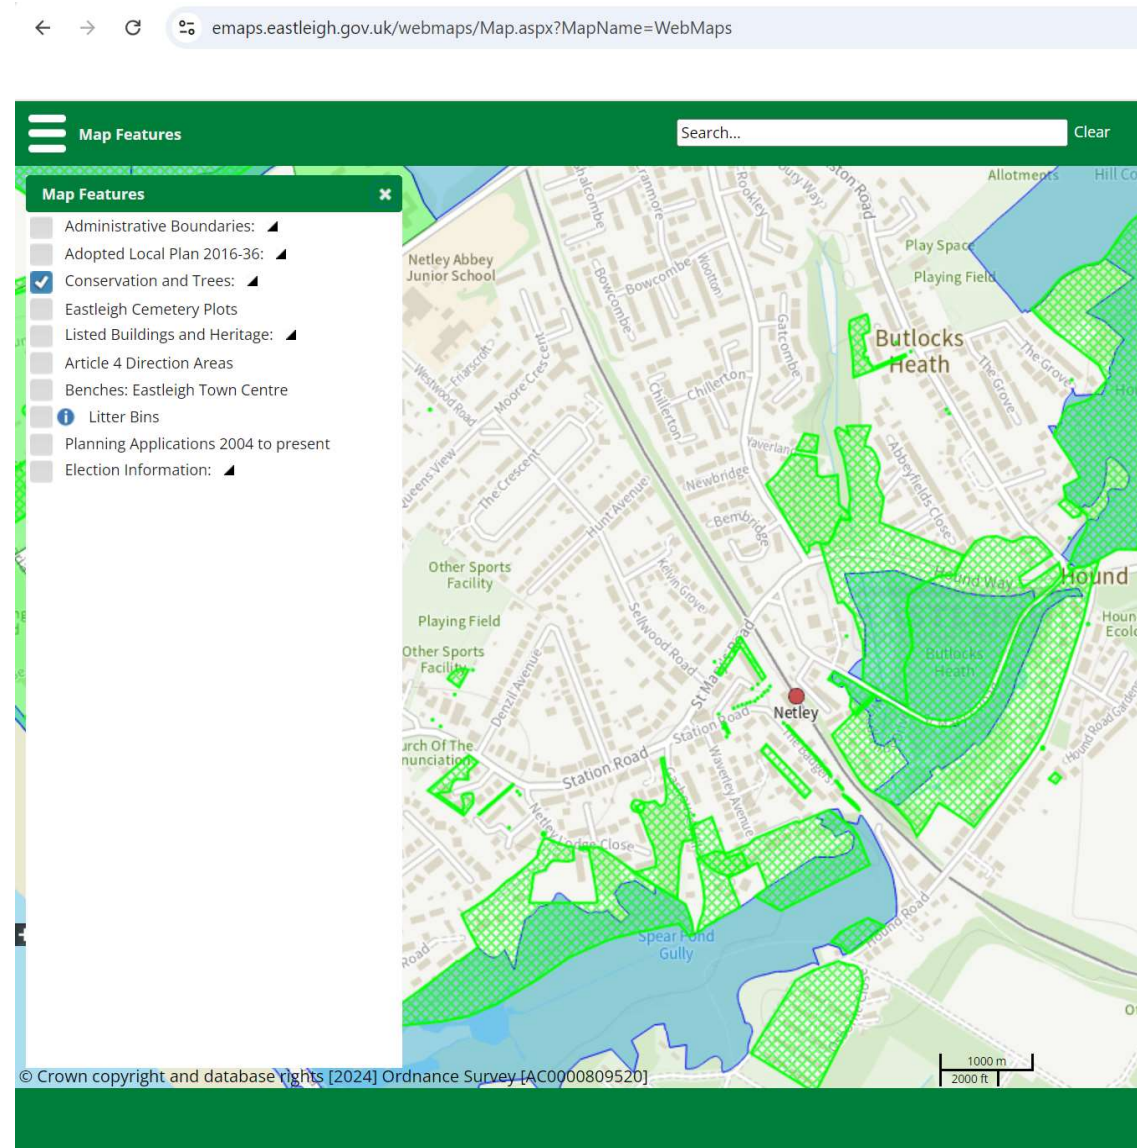

Figure 1: Eastleigh Borough Council Interactive Map showing Netley & Hound.

The code to the left is limited but suggests (see Figure3) that the belt of trees are covered by tree preservation order but that the location is NOT in a conservation area. The request being to cut the branches of three trees back to the boundary or curtilage of number 5. Currently they leave the garden in 75% shade and will hamper the potential for solar energy if we choose to install these.

A reputable tree surgeon has been consulted but no action taken.

History: Abbeyfields Close was built circa 1980 by Bovis, older residents believe the trees to have been planed and/or self-seeded around this time.

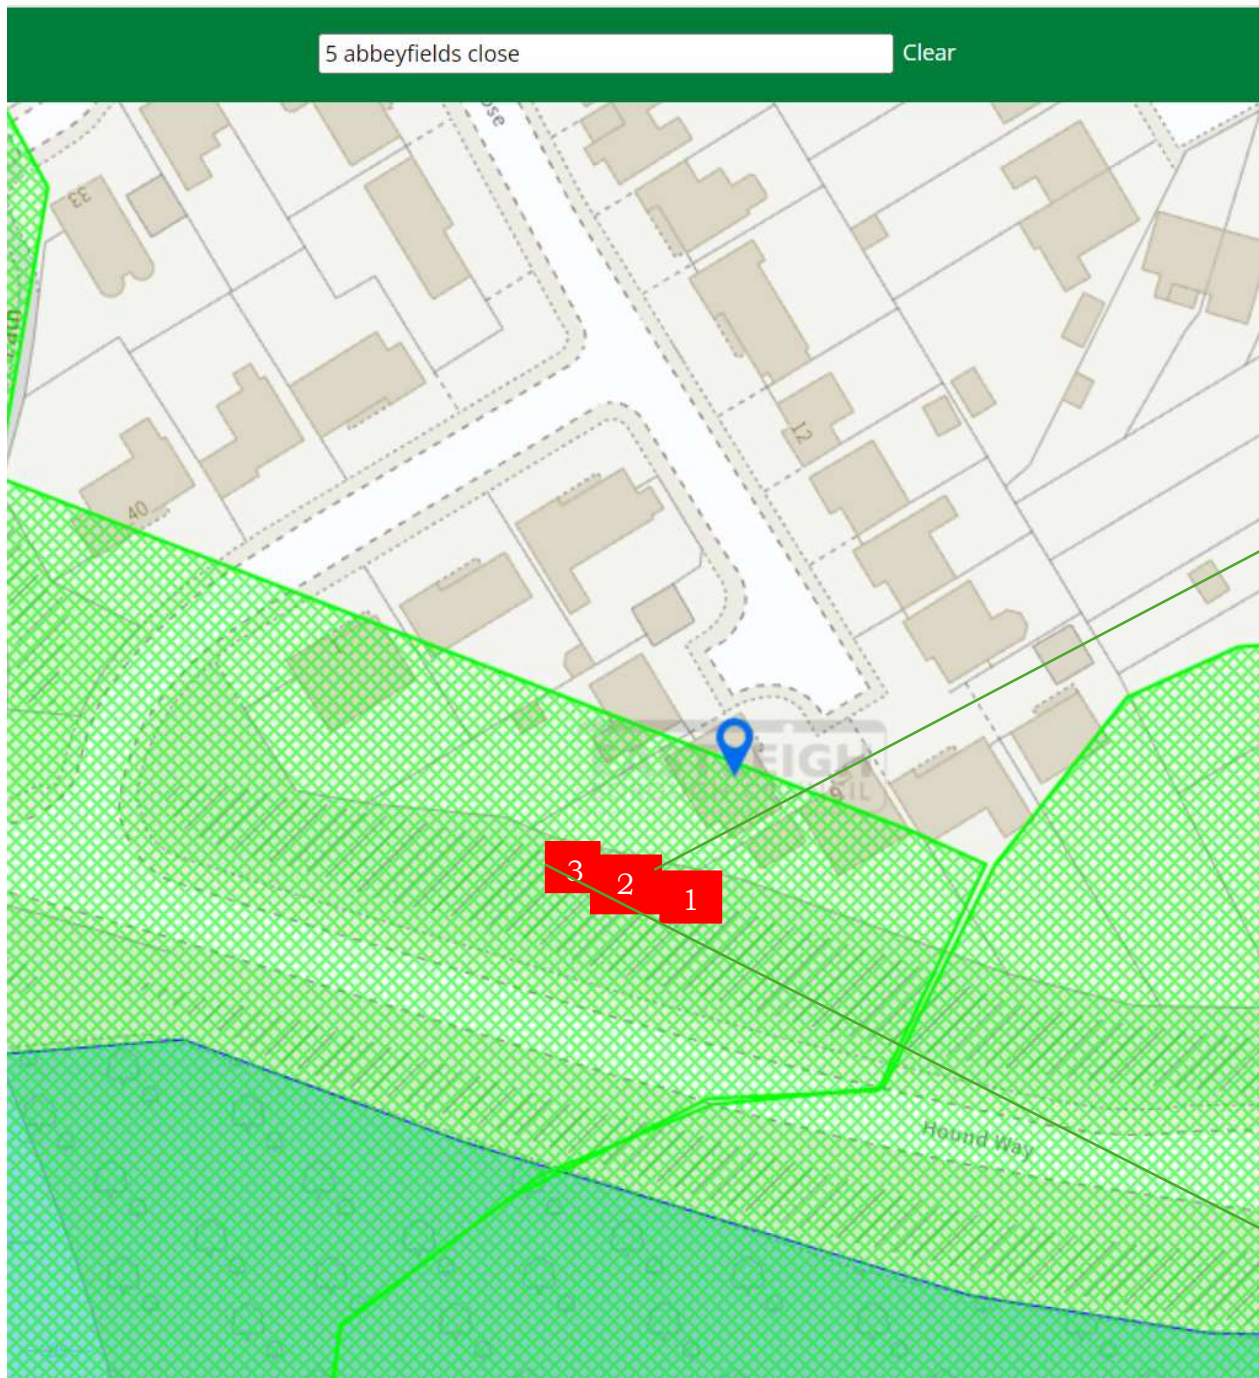

Figure 2: Eastleigh Borough Council Interactive Map showing 5 Abbeyfields Close and site of three trees just beyond property curtilage. Foster's Tree Surgeons identified two as Sessile Oaks and the third as a Wild Cherry tree.

Sessile Oaks 1, 2

Wild Cherry 3
