Subject: Re: Eastleigh Railworks application ref. X/24/97800 - road amendments

Rebecca,

A close look at drawing 18-082_010_P06 shows the pavement from the south widening from 2m at a distance of 3.5m to 3m at the southern corner of the proposed new retaining wall on the steps which is as the road kerb curves away from this heritage asset.

If this proposed new wall was moved west by approx 800mm as I suggested there will remain in excess of a 2m wide pavement, the road is totally unaffected and there is still room for a group of enthusiasts to watch the trains without impeding the pavement.

This would appear to meet every-bodies requirements.

Regards,

Tim.
