Subject: [DC/22/94190] Parcel B4, Land North and East of Boorley Green, SO32 2UA

Hi Liz,

Thanks for consulting the Pollution Team on the above application.

I have reviewed the additional information received on 25/04/2024 via email by SLR Consultants indicating that Parcel C6 is over 80% completed and confirmation provided by Vistry stating that no significant evidence of contamination was noted during works.

The Geo Environmental Material Management Report (MMP) dated 13/08/2021 (reference GE20232/MMP-B4 & C6/AUG21) indicates that approximately 1898m³ of subsoil was imported from Parcel B4 for the areas of soft landscaping and private gardens. No evidence of contamination was noted during several intrusive investigation undertaken in the site and documented in the MMP, which also reference to a Final Verification Report to be provided by Geo-Environmental. Is this report available for review, to confirm soil importation was followed in accordance with the MMP?

Best regards,

Yacklin
