

Altman, Rebecca

Subject: FW: PN/24/98596 Cockpit Farm Barn

Hi Rebecca.

The transport document refers to:-

If permitted, the site will result in 1 traffic movement in each of the AM and PM peak periods and a total of 14 traffic movements [7 vehicles] throughout the day.

Some of those movements will have been generated by previous agricultural use.

The residential house opposite has a long drive, so the additional vehicle movements will have minimal impact.

So as my previous e/mail with the proviso of no changes to the hours of operation, I have no objections to the application regarding Environmental Noise Impact.

Thanks
