

Tree protection Plan

Tree protection Fencing

Erect tree protection fencing, such as Heras fencing, a minimum of 1.5 meters from all three Birch trees, indicated in green on revised drawing Framp0623-c, creating a tree protection area between this fencing and the boundary fence. This is to be completed prior to any of the following taking place:

- Plant and Material Delivery
- Demolition
- Soil Stripping
- Construction Works
- Utility Installation
- Landscaping

Barriers are not to be removed until all works are completed.

Tree protection fence to be 2m in height.

Signage

Signage to be attached to tree protection fencing to read

Construction Exclusion Zone

No access to building contractors

No storage of building materials

No digging or trenching

No vehicle access

No Chemicals use (including cement washing)
