Richard Mitchell	59 GOODLANDS VALE HEDGE END SOUTHAMPTON SO30 4SN	Daily delivery hours / frequency need to be reduced, deliveries take place everyday, numerous times with the HGV engines or refrigeration units running for the duration of the deliveries , this is a constant drain on those of us that are residents behind Aldi . The drone of the engines can be heard within any room in the house, even with all doors and windows closed . During the summer months where doors and windows are open this noise will be more audible and become unbearable . Aldi should to install some kind of sound proofing along the rear perimeter of the store . There were no issue prior to Aldi being operational . We shouldn't have to be victim to unnecessary noise which could be easily resolved by Aldi .
Raymond Edwards	58 GOODLANDS VALE HEDGE END SOUTHAMPTON SO30 4SN	We have lodged a previous objection regarding the excessive noise generated by Aldi due to continuous fan noise and overnight deliveries (which is against current agreement). This application if successful will increase this noise further. This is affecting our sleep, peace of mind and causing stress and anxiety, not to mention the likelihood of affecting the resale value of our property (as when selling you must declare any previous or ongoing adverse issues against neighbours).
