Subject: RE: PN/24/98596 Cockpit Farm Barn

Hi Rebecca.

This increase in traffic movements would substantially increase noise levels [loading/unloading/plant movements] from the commercial premises being no longer the same as agricultural use.

Therefore, in line with my e/mail of 31st December 2024, I would recommend an acoustic survey for BS 4142 demonstrating during hours of operation, no impact at the Noise Sensitive Receptor, being a residential house.

Thanks

Paul Bieda
