Hi Liz,

Thanks for the revised landscape specification which is now approved.

Dear Tim

Following on from your comments that the revised Landscape Specification was not on Salesforce, please see the attached document that has now been submitted. I think you only had one comment remaining in relation to paragraph 1.6:

I'm not keen on the weed clearance method because it is not likely to be successful in killing persistent and deep-rooted weeds. Please amend to include a treatment of a systemic herbicide some weeks during the growing season after the initial brush cut. We should also have a brief description of the existing conditions on site so we can all be confident that the spec will work.

Thanks

Liz
