Hi David.

I refer to the application of solar panels and comment on Environmental Noise Impact.

The project description Cor Energy 19/12/24 does not give any information regarding noise generated by the inverters.

Although the levels are generally low, if the Noise Sensitive Receptor [NSR] being the residential houses Berrywood Gardens were closer to the proposed installation; we may look at compliance with the Council's standards for fixed plant/machinery.

In this case the predominant background noise is that of transportation to the M27 and Berrywood Gardens is separated by Charles Watts Way A334.

There will be no increase by the inverters to the background levels on the site and at the NSR, with no noise impact.

Therefore, I have no objections to the application.

Thanks
