

This picture taken using Google earth shows the trees along the perimeter between 22 Merdon Avenue and Merdon Junior School. There use to be two Oak trees after the back of #22 home, fairly adjacent to each other about 3 metres apart. One has been taken down by Storm Darrach, the remaining one needs to be pruned for safety. Crown reduction over the school field is required.

This picture appears to be taken in summer and the placemark shows the two trees adjacent to one another forming one large shroud. With one of the Oaks removed, it now looks like half a shroud is left.
