Subject: Tree officer response of 6th Feb Ref 24/98678

Rebecca,

As discussed, we approached the landowner to ascertain the position in respect of the removed trees referred to by the tree officer.

He explained that a number of branches had fallen off the trees and he was worried about his and his family's safety when using the site. He therefore removed the trees in question.

This was done before the submitted arboricultural report was undertaken and consequently they do not feature in the report. However, the BNG calculation has been based on these trees existing given the requirement to consider the loss of features prior to the submission of an application.

I trust that this clarifies the position.

Kind regards.

Martin
