

Japanese Knotweed (JKW) Control and Management Plan

Client : A Denham-Harding

Site: Oakfields, Winchester Road, Crowd Hill, SO50 7HA

Date 25/01/2022

Objectives:

1. To meet requirements of Environment Agency Code of Practice
2. Reduce risks of spread of JKW as soon as possible
3. Completely eradicate JKW on site
4. Provide a documented record to prove the carrying out of duty of care
5. Provide a satisfactory response to JKW issues to any interested third party
6. Enhance the value of the site

Initial Controls:

1. Identify and mark out locations of all knotweed on site
2. Apply approved systemic herbicide at recommended dosage to commence weakening of plant by stem injection (Initial application carried out Nov 2017)

Ongoing Controls:

1. Monitor site as per schedule 1 below and carry out further herbicide applications as required.
2. Collect documented evidence to form permanent record of duty of care and implementation and completion of JKW management plan

Schedule 1

2022 3 visits June, August, October

2023 2 visits July & September

2024 2 visits July & September

2025 2 visits July & September
