

Ecology response for H/25/98737 CRICKETWOOD, TANHOUSE LANE, BOTLEY,
SOUTHAMPTON, SO30 2SZ

Two storey extension to existing outbuilding following the demolition of the existing metal access stairs and balcony. New dormer. New Canopy. Alterations to fenestration

Dorothy Hei-Tung-Hoh

14/2/25

There are records of bats nearby and the proposals require extensive work to the roof. The outbuilding is not visible on Google maps. To determine whether any surveys are required I need to review close up photos taken in good light of all areas of the roof, fascia, soffits (standing next to building and looking upwards), flashings, hanging tiles, the elevations to be affected by the proposal and any potential gaps or openings. The Bats and Buildings brochure from the Bat Conservation Trust (<https://cdn.bats.org.uk/uploads/pdf/Bats-and-Buildings.pdf?v=1634310101>) has a very good diagram to show places bats may use in buildings on page 3 of the brochure.

Photos of any areas of the garden affected by the proposal are also required.

There are records of reptiles and badgers in the wider area.

Precautionary working methods for reptiles and badgers will be required.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF (December 2024) paragraphs 187d and 192 b. A bat brick and a swift brick may be appropriate for this building.

The Bat Conservation Trust recommends installing a bat brick/box at least 4 m above the ground, away from artificial light sources, sheltered from strong winds and exposed to the sun for part of the day, facing south, south-east or south-west. (<https://www.bats.org.uk/our-work/putting-up-your-box>)

Swift nest boxes are best positioned under the eaves or on walls facing north, northeast or north-west out of direct sunlight, five metres above the ground, with clear adjacent airspace so swifts can access them in a high-speed direct flight.
