Subject: RE: Block A2 / A3 amendments S73 application ref. X/25/99588 - Lower Acre

Dear Rebecca

In response to Andre's comments, I have spoken with our Technical Team and they have confirmed the following:

- As part of the acoustic strategy there are 3 levels of treatment depending where the plot is located on site.
- Wates has been procuring the suppliers glazing data sheets. To demonstrate compliance and discharge for conditions 30/31.
- I have discussed the external acoustic impact to the site, and it makes no difference with the change of the apartment blocks. The current strategy still stands, see extract of heat map below.

- Current with new buildings.
- Original strategy doc, with different shape building.

- Once Ian Sharland has completed their condition addendum report this will confirm the acoustic spec etc in accordance with the planning approved strategy.

I trust this will satisfy his concerns.

Kind regards

Stephen
