

Tree Report for :
Hamble Yacht Services
Marina Drive
Hamble
Eastleigh
SO31 4NA

Date of report: 02/08/2025
Completed by: Fraser Moncrieffe

List of Trees and details of recommended work

(reference map for location)

G1 - Group of conifers trees - Cut back to give sufficient clearance of rear road.

G2 - Group of 3 Oak trees - Raise canopy to 10m to allow clearance for vehicles and plant.

G3 - Group of bamboo and conifer - Cut back to give sufficient clearance of rear road.

T1 - Poplar - Raise canopy to 8m to allow clearance for vehicles and plant.

T2 - Oak - Raise canopy to 8m to allow clearance for vehicles and plant. Remove deadwood. Reduce Canopy by 3m to reduce sail.

T3 - Ash - Raise canopy by 5m to allow clearance for vehicles and plant.

T4 - Sycamore - Raise canopy to 6m to allow clearance for vehicles and plant.

T5 - Oak - Tree could be removed as its very close to the building and leaning over. However, if permission isn't granted to remove then suggest a 3m reduction.

T6 - Oak - Reduce eastern side by 3m to allow clearance from building.

T7 - Beech - Remove deadwood and damaged limb. Reduce eastern side by 3m and crown raise by 8m to allow clearance of building and vehicles.

G4 - Ash and Oak trees - Raise canopy by 3m to allow clearance for vehicles.

G5 - 4 Oaks - Raise canopy by 5m. Remove Deadwood. Reduce first oak by 3m on northern side to allow clarence from the building.

G5 - T3 - Oak - 3rd tree in the group has fungus bracket (Ganoderma) at the base of the tree which suggests the tree is compromised as Ganoderma feeds on dying wood. Canopy is in decline, with lots of deadwood in the upper canopy.

T8 - Oak - Remove Dead limb over toilet block. Remove deadwood.

T9 - Oak - Raise canopy of toilet block.
