

Ecology response for H/25/99802 41B WILDERN LANE, HEDGE END, SOUTHAMPTON, SO30 4EL

Conversion of garage to granny annexe

Andy Amery

2/9/25

The site is in an amber impact risk zone for great crested newts and there are records of slow worms, bats and hedgehogs in the area.

I have reviewed the site visit photos. This is a fairly recently built garage and does not have any potential bat roost features. There will be no impact on the garden for this proposal.

Please could you add the following informative to the decision notice:

In the unlikely event of any bats being found during demolition or construction, all work must stop immediately, and Natural England must be informed. Additional information is available on the Bat Conservation Trust website at <https://www.bats.org.uk/advice/im-working-on-a-building-with-bats/ive-found-a-bat-during-works>.

Biodiversity enhancements will be required in accord with Local Plan policy DM 11 and NPPF (December 2024) paragraphs 187d and 192 b.
