Verification Letter Report

Plot 300 and 303, Eastleigh Works

Presented to Diageo Investment Fund Limited

Lucion Contract Reference: Plot 300 and 303 Validation Report

Issue No.	Status	Issue Date	Comments	Author	Technical Review	Authorised
01	Final	08/09/2025		[redacted]		
				David Josling Associate Director	Will Capps Technical Manager	Robin Slade Unit Director

1.0 Introduction

1.1 Appointment

Lucion Delta-Simons Limited ("Lucion") was instructed by Diageo Investment Fund Limited (the "Client") to prepare a Remediation Validation Report (RVR) in relation to Plots 300 and Plot 303, Eastleigh Works, Southampton, SO50 5AD (the "Site").

The location of the Site is shown as Figure 1.

1.2 Context & Purpose

The purpose of this document is to provide a formal statement on the completion of remediation and mitigation measures as outlined in the Remediation & Verification Strategy (RVS) and undertaken/ implemented by eSmart Networks Ltd (the 'Contractor') for these two plots only.

For detailed information on the Site setting and full details of intrusive investigations undertaken across the wider Site prior to redevelopment, this report should be read in conjunction with Delta-Simons previous reports as follows:

- Preliminary Geo-Environmental Risk Assessment, Eastleigh Works, Campbell Road, Eastleigh on behalf of Diageo Investment Fund Ltd reference 17-1080.05 dated 18th January 2019;
- Geo-Environmental Assessment, Eastleigh Works, on behalf of Diageo Investment Fund Ltd reference 17-1080.05 dated 19th March 2019;
- Geo-Environmental Assessment, Eastleigh Works, Southampton, SO50 5AD on behalf of Diageo Investment Fund Ltd reference 17-1080.08 dated 24th November 2020; and
- Remediation & Verification Strategy, Eastleigh Works, on behalf of Diageo Investment Fund Ltd reference 17-1080.08 dated 7th September 2021.

1.3 Limitations

Lucion has obtained, reviewed and evaluated information in preparing this statement from the Client, the Contractor and their subcontractors.Lucion's conclusions, opinions and recommendations are based upon this information. Lucion does not warrant the accuracy of the information provided to it and will not be responsible for any opinions that Lucion

has expressed, or conclusions that it has reached, in reliance upon information which is subsequently proven to be inaccurate.

Delta-Simons has not been commissioned to provide validation of earthworks or materials management.

The standard limitations associated with this assessment are presented in Appendix A.

1.4 Planning Conditions

A summary of current planning applications and associated environmental conditions relating to planning application F/20/87841 are presented below. It is understood that planning has been consented at the Site and the following contaminated land requirements have been established as part of Planning Condition 30, 31, 32 and 33.

Condition 30

"Unless otherwise formally agreed in writing with the local planning authority, no demolition, construction or other development works shall commence on each phase or part of the development until the following information in respect of that phase or area of the site has been submitted to, and approved in writing by, the Local Planning Authority (LPA).

a) A Report of Preliminary Investigation comprising a Desk Study, Conceptual Site Model, and Preliminary Risk Assessment documenting previous and existing land uses of the site and adjacent land in accordance with national guidance and as set out in Contaminated Land Report Nos. 11, CLR11 (or its replacement if withdrawn), and BS10175:2011+A2:2017 Investigation of potentially contaminated sites - Code of Practice; and, unless otherwise agreed in writing with the LPA,

b) Report of a site investigation documenting the ground conditions of the site and incorporating chemical and gas analysis identified as appropriate by the Preliminary Investigation and in accordance with BS10175:2011+A2:2017, and BS 8576:2013; and, unless otherwise agreed with the LPA,

c) Detailed site-specific scheme for remedial works and measures to be undertaken to avoid the risk from contaminants and/or gases when the site is developed and proposals for future maintenance and monitoring, and arrangements for any contingency action. Such a scheme shall include nomination of a competent person to oversee the implementation of the work."

Condition 31

"Prior to each phase of the development hereby permitted being occupied or brought into use, verification by the competent person approved under the provisions of condition 30(c) that any remediation scheme required and approved under the provisions of condition 30(c) has been implemented fully in accordance with the approved details (unless varied with the written permission of the LPA in advance of implementation), shall be submitted to and approved in writing by the local planning authority.

Unless first agreed in writing with the LPA, such verification shall comply with the guidance contained in CLR11 and EA Guidance for the Safe Development of Housing on Land Affected by Contamination - R&D Publication 66: 2008. Typically, such a report would comprise:

a) A description of the site and its background, and summary of relevant site information;

b) A description of the remediation objectives and remedial works carried out;

c) Verification data, including - sample locations/analytical results, as built drawings of the implemented scheme, photographs of the remediation works in progress, etc.; and,

d) Certificates demonstrating that imported and / or material left in situ is free from contamination and gas/vapour membranes have been installed correctly.

Thereafter the scheme shall be monitored and maintained in accordance with the scheme approved under condition 30(c)."

Condition 32

"Unless otherwise formally agreed in writing with the local planning authority, no demolition, construction or other development works shall commence on each phase or part of the development until a scheme for managing any borehole installed for the investigation of soils, groundwater or geotechnical purposes within that area of phase has been submitted to, and approved in writing by, the Local Planning Authority. The scheme shall provide details of how redundant boreholes are to be decommissioned and how any boreholes that need to be retained, post-development, for monitoring purposes will be secured, protected and inspected. The scheme as approved shall be implemented prior to the occupation of each phase of development."

Condition 33

"If, during development, contamination (liquid or solid) not previously identified is found to be present on the site then no further development (unless otherwise agreed in writing with the Local Planning Authority) shall be carried out until a remediation strategy detailing how this contamination will be dealt with has been submitted to and approved in writing by the Local Planning Authority. The remediation strategy shall then be implemented as approved."

It is understood that the Local Authority have accepted that Condition 30 and Condition 32 have already been discharged for the wider Site under permission DC/21/91051 and the following document has been compiled to support the discharge of Condition 31 for plots 300 and 303 only.

2.0 Remediation Requirements

The contamination conclusions and recommendations set out in the Remediation and Verification Strategy (RVS) Report (June 2021) are summarised below:

2.1 Pre-Construction Enabling Works

- Asbestos fragments pick following removal of existing hardstanding;
- Provision of details of waste disposal of any material from the Site including waste transfer documentation and details of the receiving treatment/landfill facility;
- A record of any 'hotspots' found during construction and groundworks and the associated actions taken to remove them;
- Details of borehole decommissioning

2.2 Construction Phase

- Confirmation of the chemical results, and transfer notes detailing the place of origin of any imported topsoil/ subsoil/ fill;
- Confirmation of 300mm cover system in any soft landscaped areas;
- Confirmation of installation of appropriate potable water pipes and clean service corridors;
- Details of ground gas protection design and verification.

3.0 Construction Works

3.1 Plot 300

No extensive breaking out or excavation works have occurred within this plot of land with the only breaking of the existing hardstanding comprising the construction of a new HV cable trench along the western edge. Soil arisings from the trench have been disposed off Site at a suitable waste receiving facility with trench now resurface. No other remedial works have been completed at this location. Copies of the waste transfer notes and a photograph of the reinstated trench are included as Appendix B and C respectively.

3.1.1 Plot 303

No changes to the surface at Plot 303 have occurred with the plot retained in its existing use.

3.1.2 Borehole Decommissioning

The RVS required that all boreholes will be decommissioned as part of the enabling works due to the absence of groundwater monitoring requirements during the construction and post construction phases of the scheme. Only DS112 was installed in Plot 300 (no installations in Plot 303) however on inspecting the Site it is understood that it was not possible to locate this feature and hence this location has not been decommissioned. Given the limited changes at this plot combined with limited historical contamination this deviation is not considered to pose an unacceptable risk to the underlying controlled waters.

4.0 Clear Statement on Remediation Completion

The above report includes a summary of the information provided by the Principal Contractor in relation to the preparation of the Site for use as open storage.

Based on the information provided, and given the limited changes at the plots it is considered that the mitigation measures set out in Delta-Simons' Remediation and Verification Strategy Report have been broadly implemented and where changes to the specification have occurred these are unlikely to have resulted in an unacceptable increase in risk to users of the Site.

Appendices

Appendix A – Limitations

Limitations

This Report was prepared by Lucion Delta-Simons Ltd ("Lucion") for the sole and exclusive use of the Client and for the specific purpose for which Lucion was instructed. Nothing contained in this Report shall be construed to give any rights or benefits to anyone other than the Client and Lucion, and all duties and responsibilities undertaken are for the sole and exclusive benefit of the Client and not for the benefit of any other party. Lucion does not intend, without its written consent through a formal letter of reliance or warranty, for this Report to be disseminated to any party other than the named Client or to be used or relied upon by any party other than the named Client. Use of the Report by any other party is unauthorised and such use is at the sole risk of the user. Any party using or relying upon this Report, other than the Client, agrees by virtue of its use to indemnify and hold harmless Lucion from and against all claims, losses and damages (of whatsoever nature and howsoever or whensoever arising), arising out of or resulting from the performance of the work by Lucion. Unless explicitly agreed otherwise, in writing, this Report has been prepared under Lucion' Standard Terms and Conditions as included within our proposal to the Client.

The recommendations contained within this Report represent Lucions' professional opinions, based upon the information detailed within the Report, exercising the reasonable skill and care to be expected of a professional consultant holding itself out as having the competence, experience and resources necessary for the purpose of carrying out similar work in scope and character to the services performed. The Report needs to be considered in the light of the proposal and associated limitations of scope. The Report needs to be read and considered in full and isolated sections cannot be used without full reference to other elements of the report and any previous works referenced within the Report.

Where Lucion has obtained, reviewed and evaluated information in preparing this Report from the Client and others and Lucion conclusions, opinions and recommendations has been reasonably determined using this information, Lucion does not warrant the accuracy of the third-party information provided to it and cannot be responsible for any opinions which Lucion has expressed, or conclusions which it has reached in reliance upon information which is subsequently proven to be inaccurate.

Site surveys document the conditions encountered at the time of survey only and conditions may change due to natural processes or human intervention. As such, surveys represent an assessment at a specific point in time and Lucion cannot be responsible for adverse conditions which arise or become apparent after the time of the survey or for conditions which sit outside the scope for which the survey or Report was commissioned.

Where intrusive investigations have been completed, information, comments and opinions given in this report are based on the ground conditions encountered during the site work period and on the results of laboratory and field tests performed during the investigation. Ground conditions are inherently variable such that no investigation can be exhaustive to the extent that all adverse conditions are revealed. Conditions may therefore be present beneath the site that were not apparent in the data reviewed or obtained as part of this assessment. It should be noted that groundwater levels vary due to seasonal and other effects and may at times differ to those measured during the investigation. Lucion does not warrant or guarantee that the Site is free of hazardous or potentially hazardous materials or conditions. Where risk assessment is undertaken, this is based upon the standards, guidance and common practice at the time of the assessment and Lucion cannot be responsible for conditions which become apparent following changes in guidance or practice or advancements in scientific knowledge which change the position in relation to assessment of risk.

No aspect of this Report constitutes a design. Where this information is used in design, the designer should verify the information has been used appropriately.

Where budgets are prepared and presented within the Report, these are for information only to indicate the likely magnitude of a cost and do not represent an invitation to treat for the works. All budgets and programmes presented should be reviewed and verified by appropriately qualified and experienced independent Project Managers and Cost Consultants.

Appendix B – Waste Consignment Notes

keltbray Environmental

Waste Soil Movement Sheet

Consignor's/Carrier's/Consignee's Copy (Delete as Appropriate)

Part A Notification details

1 Consignment note code: E S M A R T / C R 0 0 1

2 The waste described below is to be removed from (name, address, postcode, telephone, e-mail, facsimile):
Esmart Networks Limited,
Campbell Road, Eastleigh, SO50 5AD

4 The waste will be taken to (name, address and postcode):
Keltbray Environmental Ltd.,
Mohawk Wharf, Bradfield Road, Silvertown, London, E16 2AX

5 The waste producer was (if different from 2) (name, address, postcode, telephone, e-mail, facsimile):

Part B Description of the Waste

1 The process giving rise to the waste(s) was: Construction of utility projects for electricity and telecommunications 2 SIC for the process giving rise to the waste 4 2 . 2 2 . 0

3. Waste Details (where more than one waste type is collected all of the information given below must be completed for each EWC identified)

Description of Waste	List of wastes (EWC code) (6 digits)	Packing Group(s)	Quantity (KG)	The chemical/biological components of the waste and their concentrations are:	Physical form (gas, liquid, solid, powder, sludge or mixed)	Hazard Code	Container Type, Number and Size
Contaminated Soil	170503		20,000	See Report: 23-50472	SOLID	HP7, HP14	8 wheel tipper

Part C Carrier's details

(If more that one carrier is used, please attach schedule for subsequent carriers. If a schedule of carriers is attached tick here. ☐)

1. Carrier Name:
On behalf of **Stansted Recycling Ltd.,**
Little Mushrooms, Pedlars End, Moreton, Ongar, CM5 0LW

2. Carrier registration no./reason for exemption:
CBDU322026

3. Vehicle Registration No. (or mode of transport, if not road):

Signature [redacted]
Date 21/09/23 Time

Part D Consignor's details

I certify that the information in A, B and C above is correct, that the carrier is registered or exempt and was advised of the appropriate precautionary measures. All of the waste is packaged ad labelled correctly and the carrier has been advised of any special handling requirements.
I confirm that I have fulfilled my duty to apply the waste hierarchy as required by regulation 12 of the waste (England & Wales) regulations 2011

1. Consignor Name: [redacted]
On behalf of **Esmart Networks Limited,**
Nexus Park Evenue East, Skyline 120, Great Notley,
Braintree, CM77 7AL

Signature [redacted]
Date 21/09/23 Time 0810

Part E Consignee's details (where more than one waste type is collected all of the information given below must be completed for each EWC)

Individual EWC code(s) received (kg)	Quantity of each EWC code received (kg)	EWC Code accepted/rejected	Waste management operation (R or D code)
170503		accepted	R5

1. I received this waste at the address given in A4 on: Date Time

2. Vehicle Registration No. (or mode of transport if not road):

3. Where waste is rejected please provide details:

I certify that waste management licence/permit/authorised exemption no(s).
EA/EPR/FP3092LH
authorises the management of the waste described in B at the address given in A4.
