

Eastleigh Borough Council Tree Preservation Order and Conservation Area Assessment Form

Application Number	T/25/100113					
Surveyor	AM					
Address	LAND TO THE WEST OF 1 PARK VIEW, HEDGE END, SO30 4EP					
Proposed work	1no. Group of Willows (G48) – Regular cyclical coppicing is proposed as the most appropriate management method to reduce this risk and ensure the continued safety of the Highway. Risk of branch or stem failure over the carriageway.					
Assessment Date	10 th November 2025					
Officer comments	HETC is the applicant. Group of roadside willows, measuring on average 15-20cm diameter and leaning towards the road. Short-lived species known for progressively leaning and collapsing. This presents risk to users of the road as well as causing periodic obstructions that require emergency responses to manage. The proposed coppicing (cutting back to near ground level and allowing to regrow from the stump) is reasonable management.					
Decision	Consent	Refuse	Part consent/ Part refuse	Withdrawn / Invalid	Conservation Area	
					Raise no objection	TPO
