

Emergency Access Note**Secondary Emergency Access Route to the Navigator Quarter**

The primary emergency access route to the Navigator Quarter will be taken from the estate road off Mitchell Way. This note identifies the route that will be taken by emergency vehicles in an event where their services are required but access cannot be provided from the primary emergency access route.

In this scenario, emergency vehicles will need to use the emergency access route provided by the Airport. Appendix A includes a plan identifying a route that will be taken by emergency vehicles. This will involve the following steps being taken:

1. Contact the Airport Duty Manager en route to request emergency escort across the runway to Gate 8.
2. Enter Airport via the Emergency Entrance to the south of the Airport, on Mitchell Way.
3. Follow green RVP signs to Gate 11 (identified by green line on plan).
4. Enter Gate 11 on blue lights.
5. Wait at Gate 11 for Airfield escort and permission to enter Airfield.
6. Follow escort (red line on plan)
7. Once through Gate 8, proceed unescorted.
8. If return journey required under blue lights across Airfield, then contact Airport Duty Manager and await escort at Gate 8.
9. Follow Airfield escort and once back through Gate 11, proceed unescorted.

As indicated by the blue arrow on the extract below, the secondary emergency access point from the Airport at Gate 8 has been incorporated into the updated Parameters Plan for the development. This entrance will be always kept clear to ensure that there is ease of movement for emergency vehicles when accessing and leaving the site.

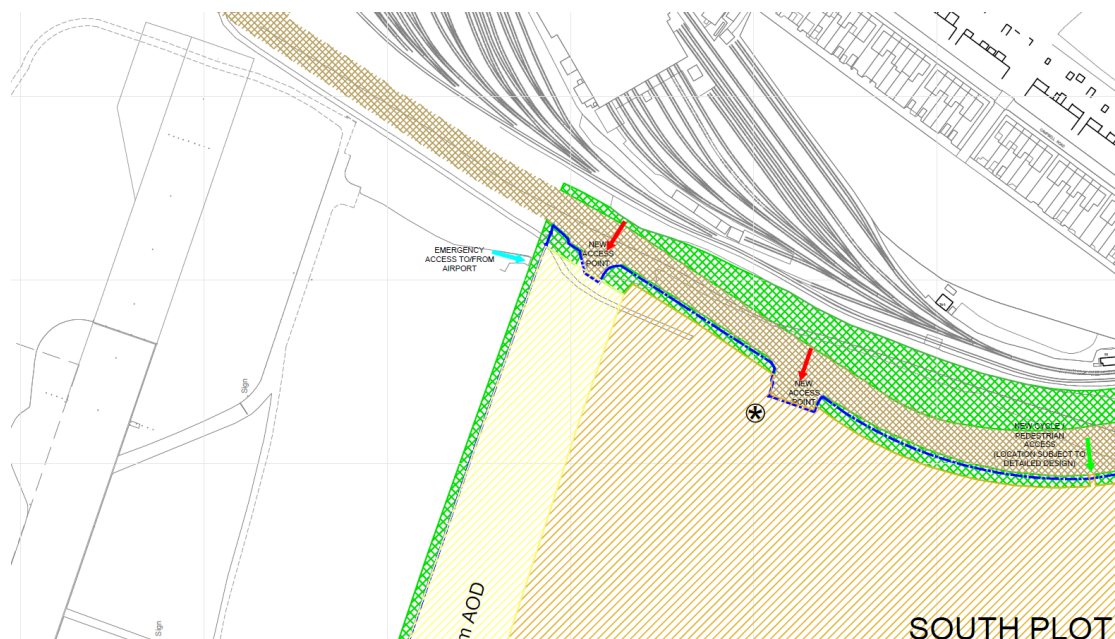

Figure 1. Extract of updated Parameters Plan showing Emergency Access to the site from the Airport.
