Officer comments	TPO 2-H (G12) and 706-E (A1) The proposed tree works are within publicly accessible woodland. Works relate to safety and have been informed by an arboricultural inspection. The site visit confirmed that some trees particularly sweet chestnut are in poor physiological and structural condition. The proposed felling and small amount of selective pruning are considered a reasonable management which is necessary in the interest of safety. No replacement required - natural regeneration will suffice to maintain woodland cover.
