NOTE:  
For plant species, densities and sizes refer to Plant Schedule and Landscape Specification.  
Main contractor to determine exact location of services/drainage, this should be confirmed on site prior to commencement of works to avoid tree pit / services conflicts.  
External light fitting types and locations are to be confirmed with the Electrical Engineer.  
External levels of hard surface treatments are to be co-ordinated with Engineers design & specifications.  
All treatment of softwork areas to comply to BS4428 Code of Practice for general landscape operations.  
This drawing assumes that the existing site soil could be re-used. However this is subject to detailed testing and analysis of soil. If the soil is not suitable, imported soil will be required in accordance with the Landscape Specification.  
All tree, shrub species supplied for designated areas are to be determined by the proposed planting season. (ie bareroot or container grown stock).
