

Eastleigh Borough Council Tree Preservation Order and Conservation Area Assessment Form

Application Number	T/25/100657				
Surveyor	AM				
Address	Greta Park, Goodalls Lane, Hedge End, Southampton, SO30 4DZ				
Proposed work	1no. Group (G53) Willow and Poplar - Fell to ground level. Self-seeded willow and poplar saplings growing along the woodland edge. These are fast-growing, short-lived species that have established in an un-managed way, resulting in poor form and limited long-term value. Removing them at this early stage will help manage the woodland edge and prevent the need for more extensive works in the future. The works will not have a noticeable visual impact, as the trees are relatively small and only recently established. Replanting within the woodland TPO is not proposed, as there is already sufficient natural regeneration on site.				
Assessment Date	23 rd January 2026				
Officer comments	Small number of small, slender, leaning willows and poplar by edge of path. Visible to the public from the main park but against backdrop of large, long-lived oak etc. Removal of this small group of trees while they are still relatively small is reasonable and will not impact on amenity.				
Decision	Consent	Refuse	Part consent/ Part refuse	Withdrawn / Invalid	Conservation Area
					Raise no objection TPO
